## Black Isle Brewery order new bottling line

Leading Scottish Organic Brewery, Black Isle have ordered a new bottling line and process system from Czech based supplier Moravek.

The new line which will produce Black Isle's existing range of organic beers in 330ml and 500ml bottle sizes at up to 2,800BPH.

The line includes a Moravek BC15/BF15 inline beer carbonator and integral sterile filtration system coupled with a Moravek 12/12/1 rinsing/double pre evacuation filler/crowner tribloc.

The new line will be located in their new expanded brewery facility and bottling hall near Inverness.

Black Isle MD and owner David Gladwin, said "we chose Moravek as the bottling system supplier as we have grown our bottling business with two Moravek CW250 carbonator filling machines which have given many years of reliable service and high quality bottled product. So it was a natural progression to move to a higher speed automatic Moravek beer bottling line as the next phase of our development.
