Press Release

Porterhouse install Moravek line

The Porterhouse Brewing Co. have installed a new Moravek beer bottling line at their brewery in Dublin. The line consists of a Moravek 12/12/1 rinser/filler/crowner tribloc with double pre evacuation, Moravek BC15 inline gas atomise beer carbonator and Moravek BF15 integral sterile beer filtration with 1 micron and 0.45 micron incorporating Domnick Hunter cartridge filters.

The line produces 330ml size bottles with the capability to also produce 500ml in future.

As a complete turnkey package Moravek also supplied a central CIP system, bottle conveyors and a Enos Euro labeller from Liquid Solutions Ltd to apply front, back body and neck labels.

Complete installation and commissioning of the 330ml bottle size was completed within 5 days.

Peter Mosley, Head Brewer at The Porterhouse Brewery, says "I am very pleased with the high quality tribloc filler and integral carbonator/sterile filtration system supplied by Moravek, trouble free installation start up and final in bottle product quality produced by our new line.
